Convey Computer™ Honored with 2008 HPCwire Editor's Choice Award: Top Vendors to Watch

***Annual Awards Demonstrate Achievement within Global HPC Community:
Second Industry Honor for Convey at SC08***

AUSTIN (Nov. 17, 2008) — Richardson, Texas-based Convey Computer Corporation was recognized today as one of the *Editor's Choice: Top 5 Vendors to Watch in 2009* during the annual HPCwire Readers' and Editors' Choice Awards, presented at the 2008 International Conference for High Performance Computing, Networking, Storage and Analysis (SC08), in Austin, Texas. This makes the second prestigious industry award to be given to Convey at SC08. The company previously announced that founder and Chief Scientist Steve Wallach will also be recognized as this year's Seymour Cray Award winner presented by IEEE later in the week.

Diane Lieberman, publisher of HPCwire, revealed the list of winners at the HPCwire booth at the event being held at the Austin Convention Center. The coveted HPCwire Readers' and Editors' Choice Awards are determined through online polling of the global HPCwire audience, along with a rigorous selection process involving HPCwire editors and industry luminaries. The awards are an annual feature of the publication and constitute prestigious recognition from the HPC community. These awards are revealed each year to kick off the conference, which showcases high performance computing, networking, storage, and data analysis.

"Every year, it is our pleasure to survey our readers in order to determine which HPC-related companies, product and technologies are making the biggest impacts in mind-share within the HPC community," said Diane Lieberman,

-more-

publisher of HPCwire. "The HPCwire Readers' and Editors' Choice Awards send a strong message to the recipients that those in the global HPC community recognize their work, and consider their efforts meritorious. Our congratulations go out to Convey and the rest of the winners."

More information on these awards can be found at the HPCwire website (<http://www.HPCwire.com>).

About HPCwire

Published by Tabor Communications, HPCwire is the most recognized and accessed news and information site covering the entire ecosystem of High Productivity Computing (HPC).

HPCwire is the publication of choice for the global community of business and technology professionals interested in computationally- and data-intensive computing, including infrastructure topics such as software, middleware, hardware, networking, storage, tools and applications.

HPCwire delivers exclusive interviews with industry leaders on topics ranging from business and economic issues to advanced and emerging technology directions, all in a timely and easily-accessible Internet format. With a powerful combination of email distribution and web site portal, HPCwire is enjoyed each week by several hundred thousand readers. HPCwire can be found online at <http://www.HPCwire.com>.

About Convey Computer Corporation

Based in Richardson, Texas, Convey Computer breaks power, performance and programmability barriers with the world's first hybrid-core computer—a system that marries the low cost and simple programming model of a commodity system with the performance of a customized hardware architecture.

Convey brings decades of experience and intellectual assets to performance problem-solving. Its executive and design teams all come from successful backgrounds of building computer companies, most notably Convex Computer Corporation and Hewlett-Packard. More information can be found at: www.conveycomputer.com.
